

## CHANCELLOR'S ENDOWMENT FUND 2007 STUDENT INITIATED EVENTS

RCO

Event

Target Audience

Academy of Students of Pharmacy

Diabetes Elective

UCSF Students

**Description:** We are starting a diabetes elective that is currently scheduled to take place on Wednesdays from 12-1pm in HSW 303. We are requesting funding to make copies of lectures for the students and gift cards for the speakers. Our elective has been approved by the School of Pharmacy. We have ten lectures set in place.

Academy of Students of Pharmacy

Dr. Mary Anne Koda-Kimble's Diabetes Talk

Any UCSF student interested in participating

**Description:** Dr. Mary Anne Koda-Kimble, Dean of the School of Pharmacy at UCSF, will be speaking to students from all schools about the many complications associated with diabetes. She will also be discussing how this disease has profound effects on all various healthcare professions.

Academy of Students of Pharmacy

HPV: The Virus, Disease and Vaccine

UCSF Students

**Description:** This event will be a lunchtime lecture given by Dr. Joel Palefsky, who is a Professor of Medicine as well as a director of the General Clinical Research Center at UCSF/Moffit/Mount Zion. He is the author of "What Your Doctor May NOT Tell You About HPV and Abnormal PAP Smears" and has agreed to give a one hour lecture on the virus and the new vaccine.

With the increasing commercials about the newly available HPV vaccine, many students are curious about this vaccine and their potential roles as healthcare providers in providing information about this vaccine and administering it to their patients. Since students from all schools should be informed about both the virus and the vaccine itself, this event will be widely advertised to students from all schools.

Academy of Students of Pharmacy

Women's Health Issues elective

UCSF students (all schools)

**Description:**

The Women's Health Issues elective is a course that is offered under Clinical Pharmacy 152.03. It is open to students of all schools at UCSF. Lecture topics of this course include: contraceptives and emergency contraception, pregnancy and HIV, breast cancer, herbs and supplements in pregnancy, pre-menstrual syndrome, mental health, osteoporosis, infertility and infertility drugs, cardiovascular disease, and sexually transmitted infections. Each of the ten lectures of this elective are given by a different lecturer. Currently, the confirmed lecturers for the course are: Dr. Ron Ruggiero, Dr. Cristina Gruta, Dr. E. Shelley Hwang, Dr. Cathi Dennehy, Dr. Diana Taylor, Dr. Patrick Finley, Dr. Deborah Sellmeyer, Dr. Shareen El-Ibiary, and Dr. Rita Redberg. Students who take this elective earn one unit of elective credit. It is graded as Pass/No Pass.

AIDS Action Network

Global AIDS Week of Action

students from all schools

**Description:**

Our group consists of members from medicine, pharmacy, dental, and nursing schools. We are organizing a Global AIDS Week of Action during the first week in March, 2007 (February 26th through March 3rd). The Week of Action is a national events occurring at most medical schools throughout the country. As UCSF already holds an education based AIDS event (AIDS Forum), this week is different in that it is dedicated to taking action in three ways: 1) locally, 2) globally, and 3) individually. Each day of the week will focus on a different topic and will be associated with an action of advocacy. The theme of Day 1 is "AIDS in the Arts" (action: symbolic solidarity), Day 2 is "Behavior Change" (action: gettin tested), Day 3 is "Access to Meds" (action: call-in campaign), Day 4 is "Global and Local Disconnect" (action: provider shadowing opportunity), Day 5 is "Taking Action"

American Dental Education Association

High School Outreach Conference

high school students

**Description:**

Though many RCOs have their own high school outreach projects, they may not have the funding available to invite their recruits to visit UCSF for a full day of activity. To increase collaboration between UCSF students of all disciplines and to increase the number of high school students from all recruitment efforts, we intend to have a High School Outreach Conference at UCSF on a given Saturday in April 2007. We will invite high school students from underrepresented areas that have exhibited an interest to pursue the health profession/sciences. These high school students will be given the opportunity to tour UCSF, learn what we do as UCSF students in our respective disciplines, speak to health care professionals, and most importantly, to identify with UCSF students who are from similar backgrounds so that they may be encouraged to follow this career path! UCSF students have taken and will continue to take an active role in recruitment and outreach to further increase student diversity; we are the best recruiters for our respective disciplines and for UCSF.

### Event

### Target Audience

American Medical Association

Dean Kessler vs the tobacco lobby

UCSF Students

**Description:** Dr Dean Kessler, the dean of the school of medicine, has agreed to talk about his experience as the past head of the FDA. In particular he will talk about the fight for public health authorities to control nicotine and classify it as a medical substance of abuse. This relates to all health professions as the sequelae of smoking has drastic effects on one's health and the health care system. Those who attend will learn about the reality of politics and lobbying in Washington and how that directly affects the health professions. The AMA, being a leading group in public health and health care advocacy, would like to sponsor this event.

American Medical Student Association

A Doctor's Testimony from Darfur/Chad

UCSF Students

**Description:** Dr. Ashis Brahma is a physician with years of experience in developing countries like India, Nepal, Burundi, Sudan, Uganda, and Ethiopia. He is currently working as the sole medical doctor at the Oure Cassoni camp in Chad caring for 27,000 Darfur refugees forced from their homes in Sudan. He will be speaking about his experiences in a refugee camp in Chad with 27,000 refugees, in a field hospital in Sudan with up to 700 kala azar patients and 100 children in a malnutrition ward, setting up a therapeutic feeding center in Uganda, while relating war and health in a broader sense. The first hour will be a structured talk for everybody and the second hour will be an informal session for personal interaction with students.

American Medical Student Association

Health Insurance Educational Session

the entire campus community

**Description:** This event will serve to educate the health care professionals at UCSF about how to navigate the health insurance system that currently exists. There are multiple providers, modes of insurance, and reimbursement methods that complicate the understanding of our health care system.

## CHANCELLOR'S ENDOWMENT FUND 2007 STUDENT INITIATED EVENTS

RCO

Event

Target Audience

American Medical Student Association

Microbicides Talk

The entire campus community

**Description:** The Microbicides talk will be a student presentation and discussion regarding the most cutting-edge therapy for women in developing countries who suffer from the threat of infection with HIV. Many students at UCSF are not aware of this intellectual development that puts AIDS prevention in the hands of the women who are most affected by this disease.

American Medical Student Association

Universal Health Care Symposium

UCSF students from all schools

**Description:** This event is an educational event that will be open to the UCSF community as well as the San Francisco community in general. The purpose of this event is to educate students from all disciplines about the pressing need for Universal Health Care in California and the United States. This event will serve to demonstrate the need for Universal Health Care, describe different modes of achieving Universal Health Care, and also to empower students with the tools to lobby their representatives in order to achieve their political goals. There will be multiple speakers from the community, student presentations, and break-out sessions in the afternoon.

Brain Interest Group

Brain Interest Group Lecture Series

UCSF students from all schools

**Description:** The Brain Interest Group will host monthly lectures publicized and open to the entire UCSF campus community. Lecture topics may include basic and clinical neuroscience, neuropharmacology, neuroimaging, neuro- and psych- nursing, psychiatry, neurorehabilitation, and neuroimaging. These lectures will be a means by which students and faculty from the various schools at UCSF can come together to enjoy lunch and learn about a range of exciting advances in the study of the human brain. In 2007, we are hoping to include faculty dinners, a mentorship/shadowing program, Brain Awareness Week activities with community outreach, and neuro exam (diagnosis, care) workshops.

## CHANCELLOR'S ENDOWMENT FUND 2007 STUDENT INITIATED EVENTS

RCO

Event

Target Audience

California Society of Health System

Project A.W.A.R.E. Antibiotic Resistance Talk

All interested UCSF students and faculty.

**Description:**

Our lunch-time talk will invite all interested students and faculty members to learn more about the Antibiotic Resistance and what actions we can take to prevent the spread of it. Our goal is to educate/train individuals in this important area of health-care and encourage them to spread this knowledge to others, including at health fair outreach events. The talk will be led by Dr. Conan MacDougall.

California Society of Health System

Dextromethorphan Abuse in Adolescence

UCSF Students

**Description:**

The Drug Abuse Project (a CHSP group) organized this lecture-lunch event in order to present a serious drug abuse problem in children to Medical, Pharmacy, Dental, Nursing and Physical Therapy students and faculty members.

The presentation was given by Ilene B. Anderson, PharmD, Clinical Professor, UCSF School of Pharmacy, California Poison Control System in San Francisco and Uerica K. Wang, PharmD, Pharmacy Resident, UCSF School of Pharmacy

The meeting was hosted by Carolina Haass, Victor Cheng and Kaman Sit (Second year Pharmacy Students) CHSP Drug Abuse coordinators.

California Society of Health-Systems

Men's Health Project's STD Luncheon Talk

UCSF Students

**Description:**

CSHP's Men's Health Awareness Group is planning on having an outreach event at San Francisco State. In order to prepare volunteers and educate the UCSF community on STD's that primarily affect Men, how to recognize symptoms, and where to get screening, we are having Dr. Jennifer Cocohoba give a luncheon talk on STD's. The talk is on Monday, March 5th in HSW-302 and we hope to have the outreach sometime in the spring.

## CHANCELLOR'S ENDOWMENT FUND 2007 STUDENT INITIATED EVENTS

### RCO

### Event

### Target Audience

Chicanos/Hispanics in Health Education

Undergraduate Conference

Undergraduate Students

**Description:** For the past several years, CHE has hosted it's Annual Undergraduate Conference Day in the Spring Quarter. The purpose of the conference is to inspire Under-represented Minorities, which include Latino, African-American, and Native American students, to enter the health professions. We have a keynote speaker, usually a successful Latino health professional, speak to the students. We provide them with breakfast, lunch, and engaging workshops within each of the schools represented at UCSF. The program has been met with great success in the past and we have received exceptional positive feedback from the students every year.

Child Neurology Interest Group

Autism Evening Seminar

UCSF students and faculty from all schools

**Description:** This year, the Child Neurology Interest Group, Brain Interest Group, and Psychiatry Interest Group are collaborating to put on an evening seminar series on Autism from a multidisciplinary perspective. We will invite the UCSF community and local public to this event which will consist of a lecture describing autism from two world experts, dinner, and a panel of parents, teachers, an adult with autism, and an autism activist. We hope to expose the community autism, a very important disease which many children and families face.

Child Neurology Interest Group

Child Neurology Interest Group Lecture Series

entire campus community, general public

**Description:** The Child Neurology Interest Group will continue its lecture series which will include 4 lectures/panels during the 2nd half of the year to expose medical, pharmacy, nursing, and physical therapy students to Child Neurology. The target audience is students in all professional schools who would like to work with children with neurological disorders.

## CHANCELLOR'S ENDOWMENT FUND 2007 STUDENT INITIATED EVENTS

RCO

Event

Target Audience

Chinese Health Professional Student

Elective Mandarin for the Health Professional

UCSF Students

**Description:** CHPSA will provide health professionals with classroom instruction by which they may acquire basic conversations skills in mandarin, with an emphasis on medical/pharmaceutical/dental vocabulary. Open to students of all schools of UCSF.

Chinese Health Professional Student

Elective: Cantonese for the Health Professional

open to all health professional students at UCSF.

**Description:** CHPSA will once again provide health professionals with classroom instruction by which they may acquire basic conversational skills in cantonese, with an emphasis on medical/pharmaceutical/dental vocabulary.

Christian Medical and Dental Association

Palliate Care and Spirituality Talk

UCSF Students

**Description:** This is a lunch time speaker event open to students/faculty from all schools. A hospital chaplain who spoke at the UCSF Palliative Care elective, will be going more in depth of how future healthcare professionals can approach end-of-life care in a sensitive and meaningful manner. Students from all schools can benefit from this talk in that it teaches how to sensitively and appropriately ask end-of-life and spiritually related questions to a diverse community. There will be lunch provided.

## CHANCELLOR'S ENDOWMENT FUND 2007 STUDENT INITIATED EVENTS

### RCO

### Event

### Target Audience

Clinica Martin-Baro

Latino Health Elective (FCM 184)

UCSF Students from all schools

**Description:**

The Contemporary issues in Latino Health is a successful student-organized lecture series open to all UCSF graduate students, SFSU undergraduates, CCSF students, UCSF staff and faculty, and to members of the San Francisco community. The primary objective of this course is to educate future health care providers about disease prevention and wellness promotion in our communities from a clinical, economic, political and social perspective. The course also aims to explore the historic factors (public health policy, migration, racism, assimilation, poverty) that have shaped and continue to impact health care access for Latinos. There are a total of 10 lectures in the series. The lectures are usually offered in the Fall of every academic year but due to the busy schedules of the main organizers this year, the lecture series has been postponed until winter of 2007. Given that many of our speakers are community organizers and activists earning modest wages from their work, we would like to compensate their commitment to education and activism with honoraria.

CORPUS Clinicus

Homeless Healthcare Elective

UCSF Students

**Description:**

The Homeless Healthcare elective gives students an in depth look at issues that plague urban transiently housed individuals. Students in any school at UCSF interested in learning about this urban underserved population are encouraged to sign up for the elective. Some topics covered include challenges for medication access in homeless clinics, drug use and culture of addiction, and mental illness in homeless populations.

Diversity Advocacy Group

Evidence Based Outreach

All members of the campus community

**Description:**

UCSF has a rich tradition of promoting diversity. However many of the outreach events and community service projects are not advertised to the campus community in any systematic way, or in any way that would promote critical evaluation, discussion, and project improvement based on analysis and evidence. We propose a lecture series that will highlight departments, faculty, and student run outreach programs and effectiveness.

These talks would promote discussion of outreach efforts amongst campus organizations that focus on diversity issues. No longer will many of these organizations work in isolation. Hopefully, the talks will also add an extra level of scientific analysis to the projects.

## CHANCELLOR'S ENDOWMENT FUND 2007 STUDENT INITIATED EVENTS

### RCO

### Event

### Target Audience

Emergency Medicine Interest Group

How to Build a UCSF Department

UCSF students

**Description:**

We have invited a leader from the UCSF Department of Emergency Medicine to speak to UCSF students regarding the formation of UCSF's newest department, the Department of Emergency Medicine. The topics covered will include how a department is formed anew, how a department functions within a hospital (for example, how budgets and responsibilities are determined), and how the formation of an official department changes the practice of medicine within a specialty. We feel that the topics will be of interest to all UCSF students that are interested in learning more about the operations of specific departments within a major medical system.

Emergency Medicine Interest Group

International Health Care

UCSF students, residents and practicing physicians

**Description:**

Dr. Matt Strehlows, an attending physician at Stanford University, will speak about his experiences in international health care. Dr. Strehlows has worked with local officials in multiple developing nations (such as India) to create programs to more effectively train local physicians. We are also contacting Dr. Tom Novotny, who is the Director of International Programs at UCSF, to co-sponsor the event. We feel that this talk will appeal to all health professionals that are looking to get involved with international health care during the years as a student, resident or practicing physician.

Geriatrics Interest Group

Geriatrics Interest Group Monthly Seminar Series

The entire campus community

**Description:**

Due to the increasing age of our society, there is an increasing need for students who are adept at caring for an elderly population. The goal of the Geriatrics Interest Group is to increase interest and education in the field of Geriatrics, while providing an environment for exchange of ideas and mentoring opportunities. Future topics include: The geriatric interdisciplinary team approach to a patient (a case study); Care of an older adult in outpatient and home health settings; Transitions in care; Proper use of screenings and preventative care; Polypharmacy overview; Palliative Care; and Physical therapy, Occupational therapy, and Rehabilitation.

## CHANCELLOR'S ENDOWMENT FUND 2007 STUDENT INITIATED EVENTS

RCO

Event

Target Audience

Health Disparities Working Group

Health Disparities Dinner Series

UCSF students, staff, and faculty

**Description:**

The Health Disparities Dinner Series (two dinners) represents an opportunity for students to interact with one another and with faculty members and community leaders in an intimate environment. These dinners will not be formal lecture presentations; instead, they will be discussions with leaders and advocates who are actively working to reduce health disparities. The goal is to open up a dialogue regarding solutions to disparities, rather than just presenting the statistics that many of us are already familiar with.

Health Disparities Working Group

Serving the Underserved Elective

UCSF students, staff, and faculty

**Description:**

This elective will be offered during Winter Quarter. It aims to introduce students to themes and issues that are relevant to working with underserved communities. The elective will be 12 weeks long, with one session each week. Speakers will include UCSF faculty members as well as community members and leaders.

Integrative Medicine Network

9th Annual Integrative Medicine Forum

UCSF students, faculty, staff, and comm members.

**Description:**

The Integrative Medicine Forum is a weekend long event that brings together current and future healthcare practitioners as well as community members for hands-on workshops and keynote speakers about various healing practices. The event occurs under the overall guidance of faculty at the Osher Center. The purpose is to promote discussion and expose our audience to the diversity of healthcare practices that exist. In addition to organizing the forum, keynote speakers, and workshops discussing topics like massage therapy and herbal medicine, the Integrative Medicine Network also writes and publishes The Guide to Integrative Medicine. This is an extensive index of a variety of healing practices, their background and philosophy and the way they are practiced. The goal of publishing The Guide is so that attendees not only learn about healing practices at the forum, but also are able to take home a reference to refer to in the future.

## CHANCELLOR'S ENDOWMENT FUND 2007 STUDENT INITIATED EVENTS

### RCO

### Event

### Target Audience

International Health Student Interest Group

Faculty Lectures in International Health

all UCSF students

**Description:**

This application is for a continuation of our successful faculty lectures from the past couple of years. We will put on 6 lunch lectures during the winter and spring quarters. Lecturers include Richard Feachem, Julia Walsh, George Rutherford, John Peabody, Nap Hosang, and Kirk Smith, all from UCSF's Institute of Global Health (downtown) or UC-Berkeley.

International Nursing Group

ING Seminar Series

UCSF Students

**Description:**

This event is held approximately 8 times a year and features student international health work, faculty international work and some community organizations that help students do international health work. These are lunch time seminars, usually on Weds, and all students/faculty/staff from UCSF are invited (and attend). We provide lunch and handouts and let the presenter share his or her work and field questions from the audience. It is usually pretty well attended, but definitely varies depending on the topic.

International Nursing Group

Where there is no doctor

Our audience is everyone interested in global health

**Description:**

This event brings together a group of experienced nurses (some alumni) from the Bay Area community to discuss how to best prepare for a career in global health and how to use the resources we have as students. We have representatives from Doctors without Borders, nurses who have worked in genocidal refugee camps, those who have worked in disaster relief and many others. This is a new event and one that has a lot of promise. It gives us a chance to work with the community members to help students understand how to have a career in global health.

## CHANCELLOR'S ENDOWMENT FUND 2007 STUDENT INITIATED EVENTS

**RCO**

**Event**

**Target Audience**

Korean American Health Professional Student

North Korea Forum

Entire campus and community

**Description:** Discussion of health and human rights issues in North Korea. Update on political issue and the role of the US and neighboring Asian countries in intervention.

Latino Association of Pharmacy Students

College Outreach

Underserved undergraduate students

**Description:** Underserved Undergraduate Community and University College Students Outreach. To provide information to underserved undergraduate college students in the San Francisco area regarding professional school to UCSF. These students will be invited to attend a one day event which will include speakers in the professional community, financial aid talks, information on professional school preparation, and professional students will talk about how they came to apply to professional school.

Latino Association of Pharmacy Students

Spanish Conversation Lessons

UCSF students

**Description:** MEDICAL SPANISH LESSONS GIVEN AT LUNCH TIME FOR THE UCSF STUDENTS TO ATTEND AND LEARN HOW TO COMMUNICATE IN MEDICAL TERMS TO THE SPANISH SPEAKING COMMUNITY.

RCO

Event

Target Audience

Latino Medical Student Association

Dia De Los Muertos Conference

UCSF Students and undergraduate stdnts

**Description:**

The Dia De Los Muertos (DDL M) Conference is intended as a motivational event targeting college students who are preparing for a future in the health field. The conference draws students pursuing a career in medicine, optometry, dentistry, pharmacy, and public health. Although thr DDL M has a Latino theme, all students are welcome, and it has developed into a unique opportunity to share our culture and draw attention to health issues prevalent in the Latino community with some of our future colleagues who are not Latino. DDL M also serves to recruit and retain students in active roles within their various pre-health career organizations throughout college campuses across California. The conference consists of motivational speakers, admissions workshops for each professional school, interactive labs in gross anatomy, optometry and dentistry, student panels, mock interviews, workshops on chronic diseases, universal health career, women in health, and an opportunity to meet with representatives from various professional schools.

Lesbian Gay Bisexual Transgender Student

Reaching Out Beyond the Classroom in LGBTI

UCSF students from all schools

**Description:**

Over the years the UCSF student community has not been able to reach out directly to the large LGBTI population within San Francisco. The 2006-2007 UCSF LGBTSA hopes to change that trend with a new LGBTI community service outreach project. LGBTSA hopes to use the money provided in this Community Service Training Event grant to train interested students for this project. The training event intends to use the money to provide food, event space on campus, advertising and honoraria/parking/gift cards for speakers and trainers for our intended outreach training events. We intend to invite three speakers to talk about three separate issues. Gay/Lesbian/Bisexual health/outreach, Transgender (possibly Intersex) health/outreach, and Gay/Lesbian/Bisexual Youth health/outreach. The training events will help also as a launching point for the outreach project. The speakers will be invited also based on their San Francisco community connections with various city LGBTI programs and institutions. Which may also serve as part of our secondary outside support/funding source for the Outreach Project.

Lesbian Gay Bisexual Transgender Student

Tobacco and the LGBT Community

UCSF Students

**Description:**

Smoking prevalence in the LGBT community is among the highest for any segment of the California population. Tobacco-related disease is one of the leading preventable killers of LGBT people. Many LGBT organizations accept funding from the tobacco industry and the queer press helps keep smoking normalized with tobacco ads and ubiquitous imagery of smoking. Few resources are allocated to address tobacco-related issues in the LGBT community. UCSF Researchers Libby Smith, PhD, and Naphtali Offen will present the results of their recently completed 4-year grant to study tobacco industry targeting of the LGBT community with principal investigator Ruth Malone. Those attending the session will learn about tobacco industry tactics to reach out to this community, responses of LGBT leadership and the community at large to those tactics, the role of the queer press in addressing tobacco-related issues, and why those interested in LGBT health should care about this issue.

## CHANCELLOR'S ENDOWMENT FUND 2007 STUDENT INITIATED EVENTS

### RCO

### Event

### Target Audience

Lesbian, Gay, Bisexual and Transgender

LGBTI Community Outreach Work Group

UCSF Students from all schools.

**Description:**

The Lesbian, Gay, Bisexual, Transgender, and Intersex (LGBTI) community has been a growing and constantly changing underserved population in health care. While UCSF has started to make steps towards increasing education about the health issues prevalent in the LGBTI communities, the UCSF student community currently does not have a direct avenue to reach out to the large LGBTI population within San Francisco. The LGBTSA hopes to fill this void with a new LGBTI Community Outreach Work Group (COW G). The LGBTI COW G has two goals:

- I. To give students direct experiences working with the LGBTI population.
- II. To help provide needed services to a population that is normally underserved.

Our main strategy will be to match with both current UCSF student run programs (i.e. Homeless Clinic & Hep B) and current San Francisco LGBTI community programs (i.e. Transgender Clinic of The Tom Waddell Health Center). We will focus on two methods of community outreach:

LGBTI Student Association

LGBTI Health Elective

UCSF Students

**Description:**

The LGBTI Health Elective is an annual event put on by the UCSF LGBTI Student Association in order to educate the UCSF community about LGBTI health issues. Topics for this year's class include: Gay Men's Health, Lesbian Health, Harm Reduction, LGBTI Youth, Queer Parenting, Intersex Health, Transgender Health, LGBTI Mental Health. In addition, we plan to have Good Vibrations come and give a workshop designed to increase participants' comfort with their own and others' sexuality. They have presented at numerous colleges and universities, as well as in a variety of health care settings. This presentation is interactive as well as didactic, and is designed to be low risk and comfortable for diverse participants. They have presented four times in the last six years at UCSF and have been very well received by the students.

MEDLINK

Medlink Outreach Activities

UCSF Students and local HS students

**Description:**

Fall (November, December): We will hold 2 full-day sessions, with a college prep component and a health/science component. The college prep components will be led by Don Woodson, with assistance from UCSF students who are Medlink mentors. The health/science components will be planned and led by UCSF students, with assistance from faculty, including Dr. Sharad Jain and Dr. Henry Sanchez.

## CHANCELLOR'S ENDOWMENT FUND 2007 STUDENT INITIATED EVENTS

### RCO

### Event

### Target Audience

Mental Health Advocacy Group

Speaker Series

members of the UCSF community

**Description:** This speaker series is designed to address the need for improved mental health care both nationally and locally. Ideally, this series will give practical advice about becoming a mental health advocate and will inspire the UCSF community to action. Topics include addressing mental health within the UCSF community, social stigma, mental health and the criminal justice system, and coordinated care for dual diagnosis patients.

Native American Health Alliance

Navajo Healthcare

UCSF students

**Description:** We will feature a lunchtime talk with a Pediatrician who is currently working in Tuba City on the Navajo Reservation. She has worked there for many years and has wonderful insight into Native Healthcare, cultural sensitivity among Native patients, and what it means to live and work in a rural setting.

Pilipinos of UCSF Student Organization

Undergraduate Recruitment Day

Undergraduate students from various colleges

**Description:** P.U.S.O.'s Undergrad Recruitment Day is a one day event wherein we invite undergraduate students to come and learn about the various graduate and professional programs that UCSF has to offer. P.U.S.O. members serve as panelists and workshop leaders and present information about the different programs that are available. We will also invite a keynote speaker from the community to speak about the importance of health care as well as the rewards of pursuing a career in the field.

Event

Target Audience

Public Health Interest Group

PHIG Spectrum of Prevention Faculty Lectures

all UCSF students

**Description:** We will continue our successful series from the fall in which we bring in health care professionals from UCSF and around SF who are big movers in the fields of public health and health policy.

Public Health Interest Group

Public Health Student Lecture Series

We hope to reach the entire campus community.

**Description:** This lecture series is designed to draw on students' diverse experiences and backgrounds in public health work and research. The Public Health Interest Group would like to sponsor a lecture series with the goal of educating the UCSF community on various current issues in Public Health.

Each of the 4 talks scheduled for the Fall quarter will be presented by UCSF students who will use their practical experience in different fields of public health as well as additional research to inform and raise awareness about that topic. Topics will range from infectious diseases, health within the Foster Care system, working with displaced people, and using evidence based medicine in clinical practice. All talks will be designed to appeal to the broad UCSF community, including all schools as well as faculty and staff.

Student AIDS Forum

19th Annual Student AIDS Forum

**Event**

**Target Audience**

Student Health Professionals for Social	Domestic Violence Conference	UCSF students, staff, faculty, and SF community
---	------------------------------	---

**Description:** See attached description.

Student Health Professionals for Social	Lecture series on torture campaign	entire campus community
---	------------------------------------	-------------------------

**Description:**

- a. Purposes:
  - i. To raise awareness for the issue.
  - ii. To teach students and health care professionals to recognize signs and symptoms of torture as well as the proper authorities where abuses may be reported.

Potential speakers: Physicians who investigate evidence of torture through forensic studies, reps from organizations that aid victims of torture in seeking asylum, policy makers/lobbyists who can discuss the current political activity surrounding torture.

Student National Medical Association	FACES Hlth Prof High School Student Outreach	High school students in Oakland FACES program
--------------------------------------	--	---

**Description:** 50 at risk Oakland high school students, who interact at the Children's Hospital Oakland through the FACES program, are bused to UCSF. They are given seminars, student panels, and exposed to anatomy and physical examination skills. They meet students and faculty from all UCSF schools through panels and shadowing opportunities.

## CHANCELLOR'S ENDOWMENT FUND 2007 STUDENT INITIATED EVENTS

### RCO

### Event

### Target Audience

Student National Medical Association

Health Disparities Lecture Series

UCSF Students, staff and faculty from all schools.

**Description:** The Health Disparities Lecture Series was conceived in 2005 by students from several UCSF student organizations including Student National Medical Association (SNMA), Latino Medical Student Association (LMSA), and the American Medical Student Association (AMSA) during a health disparities retreat. The purpose of the lecture series is to make medical students and the general public more aware of important issues related to disparities in health and healthcare. Since its conception, the Health Disparities Lecture Series has been a huge success. In the last academic year we had three lectures with an average attendance of more than 80 UCSF medical students, staff and community members. Topics included disparities in diabetes and obesity, language barriers, and disparities in mental health. We would like to continue the lecture series during the 2006-2007 academic year, addressing disparities as they relate to material from both the first and second year medical student curricula.

Student National Medical Association

UC Berkeley Shadowing Day

UC Berkeley minority/underrepresented students.

**Description:** This is an annual event in which we invite minorities from UC Berkeley to UCSF to be exposed to medical school and to encourage them to apply. This event has been a great success in the past and has included class attendance, demonstrations in the anatomy lab (proctored by the anatomy lab department), info sessions from admissions officers, tour of the school, and an extensive q&a. We've received very enthusiastic feedback from past participants and are excited that one former Berkeley student who attended the shadowing day is now a UCSF medical student.

Students for Choice

Lecture Series on Reproductive Health & Rights

Our primary target is UCSF students.

**Description:** The goal of this lecture series is to increase campus awareness and promote discussion of a variety of reproductive health issues, particularly pertaining to reproductive rights and choice. We plan to include in the lecture series: (1) a provider panel on the current microenvironment for providers, (2) a patient panel, (3) an "options" lecture (Plan B, medical abortion, surgical abortion), (4) a speaker presenting the history of reproductive rights in the US, (5) a speaker on the status of reproductive rights internationally.

UCSF Students

**Description:**

Enhancing Interprofessional Teamwork & Communication Skills to Improve Patient Care and Safety at UCSF: Students for Interprofessional Learning, the Worklife Resource Center, and Interprofessional Education Task Force have teamed up to put together a two part educational series to promote communication skills between health care professionals. The series will be lead by a qualified facilitator and will involve educational lecture as well as activities and modules that promote audience participation. The purpose of these series is to introduce the importance of interprofessionalism in the health care setting and to stress its role in improving patient care and safety.

Students for Interprofessional Learning

Interdisciplinary Approaches to Patient Care

UCSF students

**Description:**

SIL will sponsor a series of five panels in which faculty from the different professional schools will describe the role of their specialty in caring for patients that require interdisciplinary approaches:

- 1) Interdisciplinary approaches to stroke patient care: ICU nurse, neurologist, occupational therapist, speech therapist, social worker, pharmacist
- 2) Interdisciplinary approaches to pregnancy and birth: OB/GYN physician, midwife, nutritionist, neonatologist, pharmacist
- 3) Interdisciplinary approaches to death and dying: palliative-care physician, home nurse, nutritionist, chaplain, physical therapist, pain management specialist
- 4) Interdisciplinary approaches to HIV/AIDS patient care: HIV physician, HIV nurse practitioner, nutritionist, physical therapist, social worker, pharmacist, dentist
- 5) Interdisciplinary approaches to working with children and families with special needs: pediatrician, nurse practitioner,

Vietnamese Student Association

Medical Vietnamese Language Elective

UCSF Students

**Description:**

Currently, the popular Winter Vietnamese Elective has 38 UCSF Students enrolled. The Winter Vietnamese Elective is geared towards beginners. We would like to request another course of Vietnamese in Spring. This course will be a continuation of the current course and be more advanced. UCSF health care professional students have expressed interest in learning the spoken language in Vietnamese. Thus, VSA plans to have a Non-UC Instructor educate students from all UCSF schools spoken Vietnamese; students should be able to communicate better to patients in this underserved community. This will be a 1-unit elective with meeting 1 hour per week. An instructor will teach students common spoken terminologies and some medical terminologies in Vietnamese. Students will then break into small groups to practice speaking the language with the help of the instructor.

Wilderness Medicine Lecture Series

UCSF students

**Description:**

This is a lecture series with some of the foremost authorities in Wilderness Medicine. The goals of the lecture series are four-fold:

(1) To provide the most up-to-date, pertinent wilderness first aide (WFA) information to outdoor enthusiasts; (2) To develop WFA skills through a combination of lectures, group problem-solving scenarios, and a final skills practicum; (3) To develop interest in wilderness medicine opportunities; (4) To encourage interest among traditionally-underrepresented UCSF schools (pharmacy, dentistry, nursing, physical therapy).
